

LabgnosticEQA

For EQA/PT providers

Digitally connecting External Quality Assurance (EQA) and Proficiency Testing (PT) providers to labs for outstanding results.

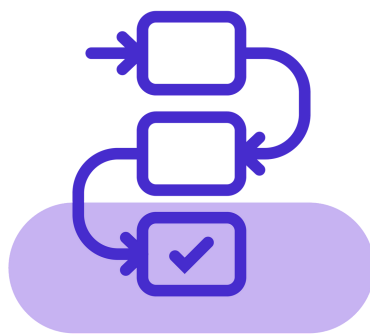

EQA and PT processes are crucial for maintaining laboratory testing quality. LabgnosticEQA streamlines EQA and PT processes by providing EQA/PT providers with access to a network of labs for digital result reporting, eliminating manual data entry issues, enhancing efficiency, and reducing delays - all through a single interface.

Your Challenge

Key challenges faced by EQA and PT providers

- 1 Manual transcription errors**
Errors in transcription can lead to inaccurate reporting of laboratory performance.
- 2 Drain on efficiency**
Inaccurate data can require time-consuming and costly error resolution and delays, which affects overall efficiency.
- 3 Difficulty accessing labs**
Existing portal solutions used for EQA/PT communication create friction for new labs. UK NHS labs indicate a preference for providers who can provide schemes digitally, and just like any other patient test request.

Our Solution

Enhance efficiency and collaboration with LabgnosticEQA

- 1 Streamlined integration**
LabgnosticEQA seamlessly connects EQA/PT providers directly to labs, streamlining any EQA/PT scheme work with all other incoming laboratory work.
- 2 No manual transcription errors**
LabgnosticEQA eliminates manual transcription for sample handling, analysis, and reporting, ensuring all EQA/PT results are reflective of lab quality.
- 3 Provides access to a network of labs**
LabgnosticEQA offers seamless digital data exchange through our network of 200+ labs. With 95% coverage of the UK's NHS, it provides easy access to customers for you and more representative EQA/PT scores for them.
- 4 Efficient onboarding**
Our dedicated deployment team will handle every part of onboarding from; initial requirements gathering to testing and production readiness, with setup complete in weeks.

How does it work?

Connecting to labs via Labgnostic enables you to request and receive samples instantly through a single interface, with the added benefit of specimen tracking and powerful customisation features.

"LabgnosticEQA is something that all UK NEQAS disciplines need to cover. It reduces pre- and post-analytical errors, reducing the possibility of incorrect and unrepresentative results entering our dataset."

**Dina Patel, Scientific Director,
UKNEQAS Immunology,
Immunochemistry and Allergy**

Benefits

Stronger datasets

Significant reduction in post-analytical errors means improved data quality and consistency for EQA/PT providers. This provides reliable benchmarks for accurate lab performance assessment.

Consistent controls

Direct integration with lab systems ensures a more comprehensive EQA process that accurately reflects lab and analyser quality, free from EQA process errors.

Efficient results

Results come in as soon as they are ready. This means your resources aren't wasted on results administration and chasing, ensuring you can efficiently put EQA/PT data to use.

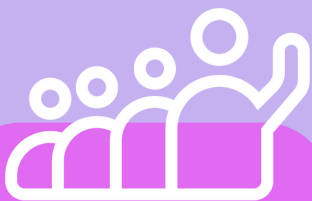

Stay ahead

LabgnosticEQA enables EQA/PT providers to stay ahead of their competition by offering their services through a seamless digital solution.

Our Partners

X-Lab is proud to cover 95% of the UK NHS. Additionally, we have established partnerships with the following international EQA/PT providers:

-  RCPAQAP Australia
-  UK NEQAS Birmingham Quality
-  UK NEQAS Haematology
-  UK NEQAS Immunology, Immunochemistry & Allergy
