NHS Blood and Transplant speed foetal DNA RhD screening

NHSBT faced a significant challenge due to outdated, manual, and paper-based forms for test requests and results reporting between their 300+ transfusion laboratories. With Labgnostic, RhD-negative mothers now receive critical RhD screening results faster, where timely reporting can be critical in avoiding haemolytic reactions between mother and baby. [Read more](#)

X-Lab launches into Order Comms Market

X-Lab launches LabReach – a web-based, order communications portal for remote requesters. Clinics and services such as Occupation Health and Mental Health, can now electronically request tests from the labs of their choice. The solution ensures safe, accurate submission, tracking and delivery of pathology test results directly to the requester. [Read more](#)

Unleashing Innovation: X-Lab's growing presence in Ireland

With momentum building in AI and digital pathology, innovation is paving the way for progress. X-Lab is fast becoming a rising star in the Irish landscape, making strides and garnering attention of laboratory leads with exciting lab interoperability solutions. With an unwavering dedication, X-Lab has now secured three significant partnerships but is also poised to welcome more pathology labs onto the Labgnostic pathology exchange network in the coming year. [Read more](#)

X-Lab launches into Australia, led by Michelle Frazer

Our Australian operations, led by Michelle Frazer as Business Development Director – APAC, opens with a strategic partner announcement with RCPAQAP and Sonic Pathology Australia. The expansion follows the extraordinary success of X-Lab’s solutions in the UK, and a desire to provide similar benefits to other countries. Labgnostic and LabgnosticEQA are now available throughout APAC. [Read more](#)

RCPAQAP supercharge their Quality Assurance Programs with automated lab interoperability

The Royal College of Pathologists Australasia Quality Assurance Programs (RCPAQAP) are strategically engaging with X-Lab and its Labgnostic EQA solution to provide paperless automation of Proficiency Testing. RCPAQAP aims to improve the quality practice of pathology, support the safety of patients and to be the recognised leader in external quality assurance (EQA) in pathology, both nationally and internationally. [Read more](#)

X-Lab launches into Australia at AACB

X-Lab had an overwhelming positive reception at the AACB (Australasian Association for Clinical Biochemistry and Laboratory Medicine) conference in Brisbane in Oct. With comments like: ‘I’ve heard of you in the UK, and we need this’. And “Finally you’re here, I’ve been telling my colleagues about you” and “We need to build regional collaboration to exchange referrals.” [Read more](#)

NPEX now known as Labgnostic

Many of you in the UK know us as the National Pathology Exchange (NPEX), where we support 95% of UK labs and processed more than 500 million tests during the pandemic. However, to align with our ongoing global expansion, our core lab interoperability solution is now called Labgnostic. Curiously many in Australia and New Zealand also know us as NPEX – so good news travels. But going forward the NPEX name is now retired, and our solutions include: Labgnostic for lab2lab interoperability, LabReach for remote order comms and LabgnosticEQA for automation of Quality Assurance and Proficiency Testing between EQA providers and labs.
